

IN THE CLAIMS

*Please amend the claims as follows:*

Please cancel Claims 1 and 2.

Q2 3. (AMENDED) A vehicle comprising:

a passenger compartment;

a seat assembly disposed in said passenger compartment, said seat assembly including a seat back extending transversely to a direction of travel of said vehicle and a seat bottom pivotally mounted relative to said seat back and movable between a seating position generally perpendicular to said seat back and a folded upright position opposing said seat back such that a top surface of said seat bottom is disposed opposite a front surface of said seat back, said seat assembly including an inertia latch mechanism for engaging said seat bottom in said folded upright position in response to a rapid deceleration in a forward direction of travel of said vehicle.

Q3 4. (AMENDED) An extended cab pickup truck, comprising:

a passenger compartment having a front seat assembly and a rear seat assembly disposed along a rear of said passenger compartment;

said rear seat assembly including a seat back extending transversely to a direction of travel of said pickup truck and a seat bottom pivotally mounted relative to said seat back and movable between a seating position generally perpendicular to said seat back and a folded upright position opposing said seat back and an inertia latch mechanism for engaging said seat bottom in said folded upright position in response to a rapid deceleration in a forward direction of travel of said pickup truck.
